Young experts

TOLEDANO HORTICOLA BIO is the fruit of the hope of a young team but with a wide experience in the growth and production of organic products. We commercialise good and healthy products, following the ways and traditions of same as ever agriculture.

FROM FIELD TO TABLE

We harvest our products according to the needs of clients, guaranteeing quality and freshness as we pick at the ideal time, very worried not to break the supply chain of our clients.

Doubtlessly, our geographic location helps the development of this sustainable agriculture thanks to our countless hours of sun. With a good use of the resources, we obtain fresh and beneficial products to our organism.

100 % organic and sustainable production for a healthy life. We join tradition with new techniques and we meet the requirements of every quality and food safety certificates at an european level. This, together with a 100% effective traceability system, makes TOLEDANO HORTICOLA BIO products a trust and safe choice.

Our more than 100 ha of own production are a guarantee for the consumer because we control every step of the process.

*"from field
to table"*

Our production

At TOLEDANO HORTICOLA BIO we carefully plan our crops using our 100 ha distributed in four areas: Subtropical Coast in Granada, Alpujarra and Poniente and Levante of Almeria.

This allows the highest efficiency in terms of resources optimization, always looking for the more suitable area for the development of those crops according to the period of the year.

RED PEPPER
